

Preventive Maintenance Package

Why laser welding machine need PM?

Decrease machine downtime :

90% of laser welding machine errors are from lacking of good maintenance.

Reduced probability of failure :

Bad welding quality and welding defects (pinholes, incomplete welding) also from machine factor.

Increased overall efficiency : Good PM, more strong and precision power

Improved safety : Checking as follow standard BGV-B2

What this package includes	Duration	DSI maintenance package
<ul style="list-style-type: none"> Machine preventive maintenance, alignment and inspection 	3 time/year	✓
- Resonator system inspection and alignment	Included	✓
- Cooling system inspection, cleaning, liquid exchange	Included	✓
- Electronic system inspection	Included	✓
<ul style="list-style-type: none"> Output power status inspection (Probe calibration) 	3 time/year	✓

Special supporting inclusive.

Special supporting package	Duration	DSI Maintenance Package
<ul style="list-style-type: none"> Free service charge for machine checking and repair* * Not included machine parts 	1 year	✓
<ul style="list-style-type: none"> Free on-site technical and welding advising supporting 	1 year	✓
